

EVAlink

EVA life Remote Control

EVA Link Remote Control

EVA Link is the new service product targeted to Clients who have an evaporator equipped with a state-of-the-art HMI. This ultimate interface allows to keep your evaporator under control and to optimize its performances, thanks to the daily checks and to the updating of parameters and programs.

EVA Link, the remote control access, is one of the most important service included into the EVA-Life program.

EVA Life, the program which makes your evaporator perfectly performing for its entire life.

Veolia Water Technologies Italia is a **reliable partner** who ensures a **lifetime guarantee for the EVALED evaporators**.

EVALED[®]
Evaporation Leadership
since 1978

The remote control access allows, through the OIRC (modem), an immediate support and troubleshooting, periodical unit check-up, report and parameters optimization, periodical back-up of the unit data and software modification.

EVA-Link allows monitoring of the water treatment unit from any location through a simple web customized interface.

The regular and proper monitoring is aimed at the optimization of the performances and at the reduction of the running costs.
