EVA Heart Maintenance

EVA Heart Maintenance

EVA Heart is the new service program targeted for Clients who are owners of a vapour recompressor evaporator (RV series).

EVA Heart provides for planned maintenance and quick interventions on the main components of the evaporator in order to make the unit perfectly performing for its entire life by reducing downtime while optimizing the maintenance work.

In keeping with the progressive nature of the company, we reserve the right to amend details without notice.

EVA Heart, the maintenance service, is one of the most important service included into the EVA-Life program.

EVA Life, the program which makes your evaporator perfectly performing for its entire life.

Veolia Water Technologies Italia is a reliable partner as ensures a **lifetime guarantee for the EVALED evaporators**.

EVA life

EVA Heart Maintenance

Thanks to EVA Heart, now it is possible to intervene on evaporator downtime and to benefit from a committed repair and maintenance service by replacing the blower - the heart of the unit - with the same model installed on the evaporator.

Features

blower full service with its replacement at least once time/year even if perfectly performing

planned maintenance inspections by skilled personnel to support maintenance activity and guarantee the constant efficiency of the unit

risk coverage for accidental events (blower replacement or intervention within 24h)

Advantages

warehouse costs reduction

evaporator always performing

downtime reduction

Maintenance agreement

The agreement provides for a planned number of inspections, on the base of the Client's needs and on the type of evaporator, the blower full service, in order to increase its reliability and the blower carriage.
